DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,124,953 to Patton in view of U.S. Patent No. 5,421,123 to Sakate et al.

Regarding Claim 1, Patton teaches a container garden with a container (Patton #12) having a bottom and upstanding sidewall and arranged to receive a lid (Patton #20) fitted thereover; a sack (#30 and Col. 2 line 67-68) formed from a mesh material to receive a growth medium; seeds (Patton #34); the pouch is of a size for fitting in and essentially filling the container (Patton Col 3 line 2-3).

Patton does not explicitly teach that the mesh sack is a cloth that contains the seed in the sack. However, Sakate et al teaches a mesh sack of flexible cloth containing seeds (Sakate #6, 2, 7 and Fig. 6(A)-(F)). It would have been obvious to one of ordinary skill in the art to modify the teachings of Patton with the teachings of Sakate at the time of the invention since the modification is merely an alternate equivalent pellet design and merely the shifting location of the seeds to provide enhanced germination conditions for the seeds. This modification does not provide a patentably distinct limitation.

Art Unit: 3643

Regarding Claim 2, Patton as modified teaches a sack formed from a nylon stocking material and is closed at one end (Sakate Col. 6 line 60 and col. 3 line 40-50).

Regarding Claim 3, Patton as modified teaches vermiculite and potting soil (Patton Col. 2 line 12 and line 61 and Sakate Col. 2 line 65), but is silent on the growth medium is a mixture of one part potting soil and three parts vermiculite. However, it would have been obvious to one of ordinary skill in the art to modify the teachings at the time of the invention since the modification is merely the selection of the component ratios of the known materials, the ratios merely derived through routine laboratory tests and experimentation to meet the growing needs of each seed variety.

Regarding Claim 4, Patton as modified teaches the seeds are wheat, barley, oats, rye and catnip (Patton Col. 1 line 25).

Regarding Claim 5, Patton as modified teaches the container and lid are each formed from a plastic material (Patton Col. 2 line 47-51).

Response to Arguments

Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Examiner maintains that Patton teaches a sack since a sack is merely a container #30 Col. 2 line 67-68 and illustrated in Fig. 1.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.**

Art Unit: 3643

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
